

The background of the entire page is a collage of various fresh ingredients and prepared dishes. At the top left, there's a green chili pepper, a red tomato, and a head of lettuce. Scattered around are several green basil leaves. The bottom half of the image is filled with several white plates containing different types of food, including what looks like chicken, vegetables, and soups. A yellow bell pepper is prominently placed in the bottom right corner. The overall color scheme is bright and healthy, with a mix of greens, reds, yellows, and browns. The text 'Relacto' is written in a large, stylized font, with 'Rel' in pink and 'acto' in orange. Below it, the tagline is in a smaller, black, sans-serif font. The entire composition is framed by soft, wavy pink and white borders.

Relacto

**Your Hassle-Free Daily Nourishment
for Recovery & Lactation by Dietitian**

About RELACTO

Eating Right Is 80% of the Breastfeeding Battle Won

Many mothers stop breastfeeding (either exclusively or partially) earlier than they intend to. This can happen due to many reasons that vary from one mother to another, but it can also be prevented by following the right diet.

ReLacto was then started in awareness of how challenging it can be for nursing mothers to obtain proper meals that will ease their breastfeeding journey.

We hold on to the belief that the right diet for breastfeeding is not just about boosting milk production, but also providing what is best for the newborn - in terms of both supply and quality to ensure their healthy growth and developments.

With every need of a nursing mother and her baby in mind, Relacto offers a wide-ranging nourishment and lactation menu carefully curated by our in-house dietitian and award-winning chef.

By **TIAN WEI**

While Tian Wei Signature's mission revolves around helping mothers start off their confinement and breastfeeding journey on the right foot, they still require further support to ensure smooth continuation once the first critical month ends.

Hence, ReLacto is created by Tian Wei Signature in the latter's efforts to help a mother continue their breastfeeding journey with ease. With the help of natural nourishments by ReLacto, mothers are able to improve their milk supply and quality effortlessly.

On top of that, our in-house dietitian and head chef specially create ReLacto's menu to see a wider variety of dishes with fewer restrictions placed on the ingredients, ideally crafted for mothers celebrating the end of their confinement and yet still seeking a healthy alternative.

Meet Our

CHEF & DIETITIAN

From the chef to each of the kitchen crews, there are many people who make it possible to bring ReLacto to life. Here are two of them.

Eugene Tan

Head Chef | ReLacto

Chef Eugene started his professional career in the culinary industry by honing his skills in international cuisine, which eventually inspired him to create interesting fusion and traditional confinement dishes at Tian Wei Signature. With his experience in curating breastfeeding-friendly and nutritious confinement meals, Chef Eugene aspires to keep supporting mothers along their breastfeeding journey with the nourishment and lactation menu at ReLacto.

Eunice Tan

In-House Dietitian | ReLacto

Eunice Tan graduated with a Bachelor of Science (Hons) in Dietetics with Nutrition from International Medical University, Malaysia. She is a Full Dietitian Member of Singapore Nutrition and Dietetics Association, a Full Dietitian Member of Malaysian Dietitian Association, and also the in-house dietitian for Tian Wei Signature. With her expertise in nutrition and diet planning, Eunice helps to ensure that every meal you have at ReLacto is packed with the key nutrients you need for recovery and lactation.

Over 100 Dishes

Made for Lactation...

At ReLacto, it is one of our main aims to provide mothers with an improved and effortless breastfeeding journey through our nourishment. We boost not only the production and supply of milk but also its quality, ensuring the best milk for babies at any stages.

ReLacto's Top Milk-Boosting Dishes

Thai Style Steamed Fish

✓ Garlic ✓ Fennel

Fenugreek Fish Soup

✓ Fenugreek ✓ Papaya

Fennel Seafood Soup

✓ Fennel

**Braised Chicken with Ginger
and Coriander Sauce**

✓ Ginger

Lemongrass Fenugreek Drink

✓ Fenugreek ✓ Moringa Leaf

Our main Lactogenic Ingredients

Ginger

- Improves blood flow
- Boosts milk production through increased blood supply

Papaya

- Promotes milk production
- Stimulates smooth muscles that work to express breast milk

Garlic

- Gives pleasant flavour to milk
- Improves breast milk odour
- Eases introduction of breast milk to baby
- Encourages baby to stay latched on longer

Fennel

- Reduces inhibitory effects of other hormones (dopamine) on breast milk production
- Ensures smooth milk flow

Fenugreek

- Boosts milk production

Moringa Oleifera

- Promotes milk secretion
- Stimulates milk production hormones

...And Recovery!

Apart from replenishing a mother's energy and blood supply after childbirth, we make sure to carefully select and incorporate nourishing ingredients that can promote the healing of wounds and restore the optimal body condition.

For Every Member of the Family

Our food is also ideal for anyone recovering from surgical procedure or anyone seeking healthy alternatives to their daily foods in general.

Main Nutrients for Boosting Recovery

Protein

- Provides building blocks to repair and encourage wound healing
- Develops antibodies that are part of setting up a good immune system

Vitamin A

- Improves your collagen formation to promote wound healing around the genital and caesarean area after labour

Vitamin B Complex

- Helps your newborn's brain to develop healthily
- Helps you and your newborn to build a good immune system

Vitamin C

- Improves your collagen formation to promote wound healing around the genital and caesarean area after labour

Vitamin E

- Reduces tissue damage from free radical formation

Iron

- Helps to supply oxygen throughout your body by developing red blood cells
- Improves your collagen formation to promote wound healing around the genital and caesarean area after labour
